FrontEnd Developer

A Software Engineer with hands-on experience in web development and front-end technologies, including JavaScript, React, HTML, and CSS, building interactive projects for e-commerce and other platforms, with a focus on responsive design and user experience. Seeking an opportunity to apply and expand skills in a dynamic tech environment.

Technical Skills

Front-End Technologies: HTML, CSS, JavaScript, React

Back-End Knowledge: Basic understanding of Node.js, Express

Other Technologies: Git, npm, Bootstrap, Wordpress, Woo-commerce

Design and UX: Responsive Design, UI Components, Figma, Elementor

Professional Experience

Gizmo-Gadgets (Independent Project)

Tech E-Commerce Website

- Designed and developed a full-fledged e-commerce platform featuring technology products.
- Utilized React for a modular and scalable architecture, creating reusable components for streamlined development.
- Developed an interactive product carousel component in React to showcase featured products with smooth, dynamic transitions and a responsive layout optimized for both mobile and desktop views.
- Ensured an intuitive, visually appealing user interface to enhance the overall shopping experience and drive customer engagement.

INTERNEE.PK (Front-End Project)

Internship Platform

- Completed a professional front-end for INTERNEE.PK as part of a personal Project, building a visually cohesive, responsive interface using React
- Focused on creating a user-friendly design with a consistent layout and intuitive navigation to improve usability.
- Leveraged state management in React to handle dynamic data and enhance the interactivity of the web application.
- Documented the development process in a screen recording shared on LinkedIn, demonstrating effective project communication and attention to detail.
